Lima, Peru (Remote · South America) | +51 961 737 705 | richard@rodasridar.dev | linkedin.com/in/rodasridar

SENIOR FRONT-END DEVELOPER (ANGULAR)

Senior Angular Developer with 5+ years designing, building, and maintaining large-scale Angular applications (v13–v21) for banking and enterprise. Deep in NgRx state management and RxJS reactive programming, with reusable, testable components and testing across Jest, Jasmine, and Karma. Experienced with micro-frontends, Nx monorepos, and using AI coding tools effectively within existing codebases. Backend familiarity in .NET and Node.js with RESTful API integration; strong communication in English (C1).

- Angular (v13–v21), TypeScript, NgRx, RxJS, HTML5, CSS3, ES6+; micro-frontends and Nx monorepo
- Testing (Jest/Jasmine/Karma), responsive & cross-browser UIs, and AI coding tools (Copilot, Claude, Cursor)

EXPERIENCE

ManpowerGroup — global AI talent platform (100K+ users) — Contract, US client Mar 2026 – Present

Senior Frontend Developer, Remote — Wisconsin, US

- Build and maintain a large-scale Angular 18 application within an Nx monorepo, applying best practices for structure, maintainability, and performance
- Built the Candidate Match module (AI-driven matching): processes batches of up to 1,000 candidates per run, reducing manual screening ~90%; integrated third-party services against a .NET 8 backend
- Use AI coding tools (GitHub Copilot, Claude, Cursor) effectively within the existing codebase, and built reusable AI skills that save ~4 hours/week
- Write Jest unit tests and build charts/dashboards (Chart.js); daily English standups with a distributed team (US, India, Mexico, Peru)

Globant — global software consultancy (NYSE: GLOB) Apr 2025 – Mar 2026

Senior Frontend Developer — Citibanamex (Banking), San Isidro, Peru

- Built and maintained a large-scale, high-security Angular banking platform for branch agents; led the Angular 14 → 16 migration while keeping it in production
- Built the frontend for a biometric digital-signature flow, cutting transactional processing time ~60%
- Delivered reusable, testable, responsive components under strict security and compliance; provided guidance to the team on front-end best practices

Globant — BCP's digital currency-exchange product (USD↔PEN) May 2024 – Apr 2025

Senior Frontend Developer — BCP (Cocos y Lucas), San Isidro, Peru

- Built large-scale, user-facing Angular UIs within a micro-frontend architecture (Angular + React), using NGRX for state management and RxJS for reactive programming
- Executed the Angular 13 → 16 migration and implemented XSRF token protection; integrated the front end with backend RESTful APIs
- Instrumented GA4 and Adobe Analytics across key flows; built reusable, testable components

10Pearls — credit-withdrawal PWA (Angular + Ionic) Mar 2024 – Feb 2025

Senior Frontend Developer (Freelance) — Banco Azteca, Remote — Mexico City

- Built core UI for a mobile-first Angular + Ionic PWA within a micro-frontend architecture (Angular + React)
- Ensured cross-browser compatibility and responsive design; wrote Jasmine + Karma unit tests
- Implemented full funnel analytics (GA4, GTM, Meta/TikTok Pixels) — delivered freelance in parallel with full-time work

Social Capital Group Nov 2023 – May 2024

Full Stack Developer, Miraflores, Lima, Peru

- Built an Angular 15 front end and PHP backend with RESTful APIs, including database design and query optimization in MySQL
- Set up CI/CD pipelines and Docker deployments on AWS; contributed to UI/UX design in Figma

T-ID Solutions (TÖNNJES) — vehicle-identification solutions (German TÖNNJES group) Jul 2023 – Sep 2023

Full Stack Developer, Lima, Peru

- Developed Angular 15 + .NET Core 6 features with REST integration against PostgreSQL and MongoDB; performed integration testing

Asociación de Exportadores (ADEX) — Peru's leading exporters association

Aug 2022 – Jul 2023

Full Stack Developer, Lima, Peru

- Designed and built a Single Sign-On (Angular + .NET Core 6) centralizing company-wide access, reducing security vulnerabilities ~60%
- Delivered dashboards, advanced filters, and search enhancements across management modules in Agile sprints

PROJECTS

Magrolabs — production e-commerce API

- Node.js/Express + PostgreSQL API in production with LLM-powered features and full observability

Hermes — agentic voice-coding pipeline

- Turns Telegram voice notes into supervised Claude Code sessions

SKILLS

Angular: Angular (v13–v21), TypeScript, NgRx, RxJS, reusable/testable components, services & modules; micro-frontends

Testing & tooling: Jest, Jasmine, Karma; Nx monorepo; Git; front-end build tooling (Angular CLI / Webpack)

AI coding tools: GitHub Copilot, Claude, Cursor (used within existing codebases); reusable AI skills

UI & performance: responsive design, cross-browser compatibility, UI/UX (Figma), accessibility, performance optimization, charts (Chart.js)

Backend & APIs: .NET / C#, Node.js / Express, RESTful API integration

Cloud, security & DevOps: AWS, Azure DevOps, Docker, CI/CD; XSRF protection, biometric flows

Also: HTML5, CSS3/SCSS, JavaScript (ES6+), Tailwind CSS, Angular Material, Bootstrap; Agile/Scrum

Languages: English (C1), Spanish (native), Portuguese (professional)

EDUCATION & CERTIFICATIONS

Systems Engineering — Universidad Peruana de Ciencias Aplicadas (UPC), 2023 • Computing — CIBERTEC, 2019–2022

Certifications: Agile Software Development; Artificial Intelligence Fundamentals
